Connect Innovation

MP4 Service with Automated Subtitling

eSyncTraining

CONVERT ADOBE CONNECT RECORDINGS TO MP4 WITH SUBTITLES USING A FULLY AUTOMATED SYSTEM

The MP4 Service by eSyncTraining with automated speech-to-text subtitling is the first of its kind, giving Adobe Connect users the ability to produce true post-production 508 compliant recordings that can be viewed on a desktop or mobile device. The unique speech-to-text tool provides full annotation of the video conversation with up to 98% accuracy and exclusive text editing capabilities for users to search and correct text within their transcript. Download the transcript as a PDF or HTML file for optimal sharing.

The subtitle editor enables users to search the recording for keywords and correct any errors captured through the automated speech-to-text process including proper names and slang terms.

The MP4 service with subtitles integrates directly with your Adobe Connect account and your eSyncTraining LMS LTI integration.

UNBEATABLE ACCURACY
Our speech-to-text feature provides the full recording conversation with unprecedented accuracy.

COST-EFFICIENT CAPTIONING
The automated speech-to-text process is faster, cheaper, and less of a hassle to use compared to the hiring of a live captioning service.

TIME-SAVING TECHNOLOGY
The MP4 service converts files on the backend, allowing users to use their computer or device during the rendering process. That's right. No locking up of your computer during the conversion.

SEARCHABLE RECORDINGS
The search function within the subtitle editor allows users to scan the text file for keywords.

SUBTITLE REFINEMENT
Format, modify, and proof text captured in your recordings, allowing you to ensure accuracy and timing throughout the captioning process.

MULTI-DEVICE SUPPORT
Videos are converted for easy native playback on mobile devices including iPhones, iPads, and Android devices.

*Available for Adobe Connect 9 and above. Supports On-Premise, Hosted, and ACMS deployments.

Call eSyncTraining trusted reseller, Connect Innovation with any questions on the MP4 service.
